

Acme Robotics — Q3 2026 Business Review (Excerpt)

Revenue. Q3 revenue was 42.1 million US dollars, up 28 percent year over year. Recurring software revenue contributed 11.3 million, which is the first time software has crossed the 10 million quarterly mark.

Customer metrics. Net new logos in Q3 totaled 14, bringing the active customer count to 137. Gross revenue retention was 96 percent and net revenue retention was 118 percent, driven primarily by expansion at the top ten accounts.

Operational highlights. The Gen-4 warehouse robot shipped to its first three customers in September. Field reliability across the installed fleet exceeded 99.2 percent uptime. The engineering team opened a new office in Austin, Texas, bringing total headcount to 312.

Outlook. Q4 pipeline coverage stands at 2.7 times target, with the largest open opportunity being a 7 million dollar expansion at a top-three retail customer. Management reaffirms full-year guidance of 160 to 170 million dollars in revenue.
